

Founding host program

Help CampIn build India's verified camping supply.

This is the real host-intake system for the validation phase. CampIn is looking for safe private land, farms, estates, homestays, and road-side businesses before any booking engine is built.

Earn without becoming a resort

CampIn is designed for farms, estates, homestays, and quiet land that can host responsibly.

You keep control

Hosts decide rules, capacity, pricing, availability, and whether a stay is accepted.

Proof builds trust

Honest photos and amenity clarity matter more than polished travel-portal language.

Minimum review standard

- ✓ Exact Google Maps pin before any listing decision.
- ✓ Usable washroom, water, and safe ground or parking.
- ✓ Actual photos of the site, access road, washroom, and camping area.
- ✓ Clear permission status and a host or caretaker reachable by phone.

90-day supply target

30 host applications and 10 verified candidate sites before CampIn builds paid booking infrastructure.

Host interest form

Turn land into a reviewed outdoor stay.

The form asks only for inputs needed to judge permission, amenities, safety, and founder follow-up.
